Colour for life

Layered Finishes by ECOTONE

PANELWOOD

VERMONT STATE

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Vermont State**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

SALEM

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Salem**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

GOL DUHN

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Gol Duhn**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

ADMONE

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Admone**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

ALTESSA

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Altessa**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

FLUSHED MAHOGANY

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Flushed Mahogany**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

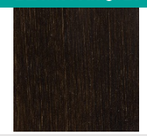
BOLD WALNUT

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Bold Walnut**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

BLACK PARQUET



Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelWood**
Colour: **Black Parquet**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

PANELCRETE

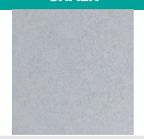
SANDSTONE

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelCrete**
Colour: **Sandstone**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

CHALK

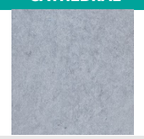


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelCrete**
Colour: **Chalk**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

CATHEDRAL

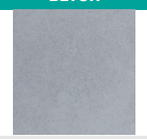


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelCrete**
Colour: **Cathedral**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

BETON

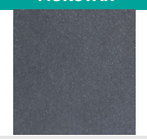


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelCrete**
Colour: **Beton**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

MOKUTAN

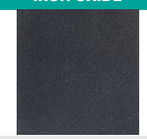


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelCrete**
Colour: **Mokutan**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

IRON OXIDE



Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **PanelCrete**
Colour: **Iron Oxide**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

SUREAL

CORNERSTONE

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Sureal**
Colour: **Cornerstone**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

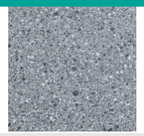
ADAMITE

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Sureal**
Colour: **Adamite**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

POTSHERD

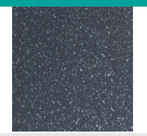


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Sureal**
Colour: **Potsherd**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

DEEP SPACE



Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Sureal**
Colour: **Deep Space**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

SAROO

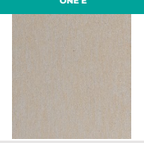
BRIC A BRAC

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Saroo**
Colour: **Bric A Brac**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

ONE E



Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Saroo**
Colour: **One E**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

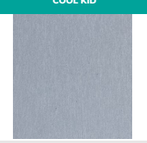
TERRACOTTA

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Saroo**
Colour: **Terracotta**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

COOL KID

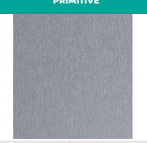


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Saroo**
Colour: **Cool Kid**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

PRIMITIVE

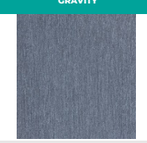


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Saroo**
Colour: **Primitive**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

GRAVITY

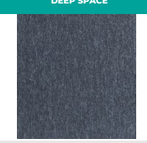


Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Saroo**
Colour: **Gravity**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

DEEP SPACE



Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Saroo**
Colour: **Deep Space**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

CORSO

SANDCASTLE

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Corso**
Colour: **Sandcastle**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

WOOD CORK

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Corso**
Colour: **Wood Cork**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

COTTA

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Corso**
Colour: **Cotta**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

KIBO

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Corso**
Colour: **Kibo**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

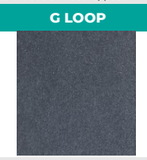
CARBON 6

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Corso**
Colour: **Carbon 6**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

G LOOP



Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Corso**
Colour: **G Loop**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.

MERCURIAL

Specification:
The following product specification is to be applied to compliant walling and/or soffit panels for long term colour aesthetics according to design listed below;

Product: **ECOTONE Surface Treatment**
Range: **Corso**
Colour: **Mercurial**

Please note: Each finished panel will have natural variation from sample adding to the overall visual appeal.
